

MUHAMMAD ZULHELMI BIN NOOR AFENDI

Contact

Port Dickson, Negeri Sembilan (+60) 18 – 2891857

zulhelmiafendi@gmail.com zulbiasa.github.io

Profile

Highly motivated Computer Science graduate with a strong foundation in IT support, system maintenance, and technical problem-solving. Proven track record in troubleshooting hardware and software issues to ensure seamless business operations. Proficient in enterprise IT environments, complemented by software development experience in Java, Flutter, and Microsoft Power Platform. A fast learner with solid communication skills, currently expanding technical expertise as a Desktop Support professional

Experience

October 2022 – August 2023

IT Technician (L2), *Sigma Rectrix Systems (M) Sdn. Bhd.*
Provided technical support for hardware, software, and network-related issues to ensure seamless daily operations for client. Assisted with system troubleshooting, maintenance, and updates.

October 2025 – March 2026

Internship Digital Transformation, *Matrix Concepts Holdings Berhad*
Designed and developed a digital onboarding application using Microsoft Power Apps and Power Automate to replace legacy manual workflows. Engineered automated data routing and approval processes to streamline the new hire experience, eliminate physical paperwork, and minimize administrative bottlenecks.

August 2026 – Present

Desktop Support (K-Youth Programme by GRADUAN), *AirAsia Aviation Management Services Sdn. Bhd.*
Delivering responsive desktop support by diagnosing and resolving hardware and software anomalies for AirAsia staff. Manage the deployment and configuration of IT equipment and utilize ticketing systems to track, document, and resolve technical issues effectively. Perform routine system maintenance and network configuration to optimize overall IT infrastructure performance.

Education

October 2023 – March 2026

Universiti Teknikal Malaysia Melaka (UTeM), Melaka
Bachelor of Computer Science (Software Development) with Honours
CGPA : 3.51

Jun 2020 – March 2023

Politeknik Seberang Perai, Penang
Diploma in Information Technology (Digital Technology)
CGPA : 3.93

Skills

System & IT Support:
Computer hardware troubleshooting, Software installation/configuration, Network setup (LAN/Wi-Fi), Operating system maintenance (Windows/Linux), IT Ticketing Systems

Data Analytics & Business Intelligence:
Data Analysis, Data Visualization, Business Intelligence methodologies, Data Manipulation

Tools & Platforms:
Microsoft Power Apps, Power Automate, SharePoint, Git/GitHub, Visual Studio Code, Android Studio, AntiGravity

Programming & Development:
Python, Java, Flutter, HTML, CSS, JavaScript, Laravel

Database & Backend:
Firebase, MySQL, PHP, Supabase

Other Skills:
Technical Documentation, Problem Solving, Team Collaboration, UI/UX Design

Final Year Project (FYP)

Second-Hand Student Marketplace (#StuMart)
A mobile application that enables university students to buy and sell used items within their campus community. Implemented using Flutter and Firebase, featuring email authentication, real-time chat, deep linking, and post management. Designed to provide a secure, student-verified platform to promote sustainability and affordability among students.

Back2Home
Developed an Android application using Java, Android Studio, and Firebase to digitalize the student leave request process at Politeknik Seberang Perai. The system replaces manual paper-based approval with an online workflow where students can submit requests, Felo can approve or reject digitally, and guards can verify status via QR code scanning. The app streamlines check-out and check-in procedures, reduces paperwork, and improves overall efficiency in managing student movement.

Achievement

3rd on UTeM GDSC Code Battle (Group)
Achieved 3rd place in a university-level competitive programming event organized by Google Developer Student Clubs (GDSC), demonstrating strong teamwork and problem-solving skills.

Certificate

Android Certified Associate Developer (2022)
Credential validating foundational Android app development skills, including UI design, activity lifecycle management, data storage, and debugging using Android Studio and Java/Kotlin.

Python Programming Fundamentals (2025)
Certification demonstrating a solid understanding of Python basics such as variables, control flow, functions, data structures, and object-oriented programming—ideal for entry-level software development roles.

Professional Data Analytics & Business Intelligence Programme (2026)
Intensive training programme demonstrating foundational skills in data analytics and business intelligence, including data manipulation, visualization, and dashboard creation to support data-driven decision-making.
